RELEASE DATE: May 2005

AUDIENCE: Fire and Water Damage Restoration Market

NEW ULTRASONIC FIRE RESTORATION SYSTEM ELIMINATES TIMELY LABOR AND IMPROVES PROFITABILITY

Simi Valley, CA – Omegasonics has just announced their Omega Fire Pro 1800BT® bench top unit, their most economical fire restoration system available. The generator is external rather than internal making it ideal for maximum portability for on-site small contents cleaning operation.

Clean 300 figurines in an eight (8) hour shift. The Fire Pro 1800BT® is ideally suited for on-site small content projects. Although cost savings will vary from user to user, a number of restorators have paid for the equipment on a single job.

Special features maximize cleaning efficiency. Using a combination of unique design features, the Fire Pro 1800BT® is safe and economical to operate. A fully insulated tank body with a non-immersion, silicone blanket heater provides accurate tank heating with no exposed heating elements that can harm employees. An external generator is used to maximize portability and reduce weight. External Power Adjust provides precise ultrasonic control to protect delicate surfaces such as crystal and fine china with gold inlay borders.

For more information on Omega Fire Pro ultrasonic parts washing system. Call Omegasonics at 1.800.669.8227 or email your request to omegasonics@omegasonics.com. Omegasonics designs and manufactures a complete line of ultrasonic fire restoration cleaning systems, biodegradable cleaning agents, supplies and accessories. Additional information is available at <http://www.omegasonics.com>.
