RELEASE DATE: May 2005

AUDIENCE: Fire and Water Damage Restoration Market

NEW ULTRASONIC FIRE RESTORATION SYSTEM ELIMINATES TIMELY LABOR AND IMPROVES PROFITABILITY

Simi Valley, CA – Omegasonics has just announced their Omega Fire Pro 5200®, the largest, most versatile ultrasonic fire restoration system available for fire and smoke restoration contractors. The unit is large enough to accommodate a wide variety of items including electronics, parabolic light lenses and window blinds.

Increase profitability by 500% over hand cleaning. The Fire Pro 5200® is designed for the most efficient use of the Omegasonics Assembly Line cleaning process which can increase work flow on general contents from one (1) box per hour to as many as ten (10) boxes per hour. Although cost savings will vary from user to user, a number of restorators have paid for the equipment on one (1) job alone.

Special features maximize cleaning efficiency. Using a combination of unique design features, the Fire Pro 5200® is safe and economical to operate. Fully insulated tank bodies with digitally controlled, non-immersion, silicone blanket heaters provide accurate tank heating with no exposed heating elements that can harm employees. Self-contained generators are enclosed and fully protected for safety from damage and abuse.

More optional features. Optional features include a dual stage filtration system to filter out even mold spores and gray water contamination to as fine as one (1) micron. External Power Adjust provides precise ultrasonic control to protect delicate surfaces such as crystal and fine china with gold in-lay borders. Digital Timer allows for exact cleaning times to protect delicate items from extended exposure to ultrasound.

For more information on Omega Fire Pro ultrasonic parts washing system. Call Omegasonics at 1.800.669.8227 or email your request to omegasonics@omegasonics.com. Omegasonics designs and manufactures a complete line of ultrasonic fire restoration cleaning systems, biodegradable cleaning agents, supplies and accessories. Additional information is available at <http://www.omegasonics.com>.
